Julia T. Hunter M.D.

Chirally Correct, NON-toxic Skin Care

Instructions: Apply in **EVENING only**, first product after washing, ½ dropper full amount in palm of hand. May mix with VITAMIN C PLUS. Apply thin layer to entire face, neck, chest, once a week, for 1-3 weeks. If no skin irritation, increase every 1-3 weeks to twice a week, every other night, then nightly. Another 3-4 weeks, if no skin irritation, may apply 2 layers per night. Wait 2 minutes after applying, then can apply, depending on what you are using, NIGHT REGENERATION, VITAMIN A PLUS, EMU OIL or HYDRATION, Retin-A. Use on body brown spots, stretch marks, scars, growths, nightly if no irritation or increase use as above. If you experience any skin irritation it is because the product is quite therapeutic. With irritation, stop PEEL, VITAMIN C PLUS, VITAMIN A PLUS and Retin-A (if using) for 3-5 days, soothe/calm with EMU, SERUM, NIGHT REGENERATION, HYDRATION, SUN PROTECTION and REPAIR, then restart, decreasing usage one night per week for 4 weeks then try again to advance use.

CORRECT, non-inflammatory, physician strength, chemical peel exfoliation of skin of the ENTIRE body is an ESSENTIAL additional piece of the prevention, treatment, rejuvenation and restoration battle and puzzle. Correct exfoliation results in skin that is tighter, volumized with less wrinkles, crinkles, cellulite, undesired brown pigment, spots, growths and lines, therefore turning back and slowing down the clock. You see smaller pores, lessened scars and abnormal cells, more clarity, plumpness and beauty, as skin is stimulated to work at a more youthful level of functioning. CORRECT, therapeutic exfoliation is an alternative to ablative lasers and is often needed to help prevent the formation of and treat, blemishes, blackheads and whiteheads.

Skin exfoliation and stimulation IDEALLY is accompanied by optimizing the body's internal organs and hormone functioning as this results in better and faster visible results, by clearing, preventing, restoring, rejuvenating and achieving goals, along with promoting health, feeling and thinking better, more energy, endurance, brainpower and less weight struggles.
