WHY EMU DERMYL...

SKIN THERAPY EMU OIL now with NEODERMYL® - known as the “needle-free” collagen and elastin “filler” because it is PROVEN to re-energize aging, retired skin cells - fibroblasts - to YOUTHFUL function, remarkably VISIBLY increasing collagen and elastin production, combatting quickly, efficiently and effectively the wrinkling, sagging, volume, moisture loss and inflammation causing aging and skin conditions.

SKIN THERAPY EMU OIL is a UNIQUE, MAXIMAL Strength Emu and Cloudberry oils combination THERAPY, the ULTIMATE vehicle, now combined with Neodermyl® - to deliver MAXIMAL, DEEPEST penetration to the skin cell's mitochondria - the energy factory of every cell - for OPTIMALLY re-vitalized cellular rejuvenation for skin firmness, volume, moisture, health replenishment.

With aging, skin cells/fibroblasts no longer have the energy supply to produce their products, collagens and elastin, effectively nor adequately to keep up with loss. By providing a SCIENTIFICALLY PROVEN, ULTIMATELY EFFECTIVE NEW ingredient source of bio-energy - NEODERMYL® - this production is exponentially reactivated and re-animated!

Neodermyl® RE-invigorates, doubling senescent/retired/aged fibroblasts activity - the cells that produce the ESSENTIAL skin replenishing components to:

- ◆ Increase collagens I and III (youth collagen) synthesis – EXTRAORDINARILY visible improvement of skin density/volume and firmness/lifting.
- ◆ Increase elastin production - improvement of skin elasticity/lifting.
- ◆ Laser and all skin procedures and products will work better due to the increased fibroblast function, collagen and elastin production.

MARKEDLY VISIBLE REDUCTION OF DEEP WRINKLES' DEPTH AND SKIN VOLUME IN ONLY 15 DAYS and INCREASINGLY OVER TIME!

SKIN THERAPY Emu Oil synergized with each unique, maximal strength Skin Therapy product provides ULTIMATE SKIN PRODUCT STRENGTH POSSIBLE, currently formulated with Neodermyl® - for fast, visible, results-proven efficacy. Combined with optimizing INTERNAL body health and cellular function, results are physiologically expected to be the most remarkable!

MAXIMAL, Physician-strength EMU DERMYL PROTECTS, PREVENTS, CORRECTS, REJUVENATES, SOOTHES, and RESTORES ALL skin types. It contains NOW ULTIMATE therapeutic, regenerative properties for inflamed, dry, damaged, sensitive, irritated skin, skin conditions and scarring.

From HEALTH comes BETTER Beauty and SLOWER ticking of the clock!

EMU DERMYL = RESULTS

WHY EMU DERMYL

DOSE DEPENDENT INCREASE: EMU DERMYL DOSE IS 2%

Improvement of fibroblasts vitality

Production of Pro-collagen I *in vitro*

THE ESSENTIAL ROLE OF COLLAGENS AND ELASTIN IN A YOUNG SKIN

The extracellular matrix (ECM) of the skin is composed of polymers that provide skin all of its properties: young skin is supple, firm, volumized and elastic. These polymers are different types of collagens (mainly collagens I and III) that maintain skin's structure. Compared to hyaluronic acid (another major component of the ECM), collagens and elastin are sophisticated 3D proteins. Collagen I represents almost 90% of the total collagen, and collagen III is the youth collagen.

AGING > LESS COLLAGENS AND ELASTIN PRODUCTION > LESS ENERGY

Enzymes (collagenases and peptidases) are degrading collagens and elastin causing aging. This is particularly true for collagen III, the youth collagen, which degrades even faster than collagen I and almost disappearing with aging. Aged fibroblast cells are no longer capable of keeping up the production pace for these polymers against the loss due to energy loss in the mitochondria of each cell required to drive this production. The main consequences are the formation of wrinkles, loss of firmness, volume and elasticity, thus sagging.

NEW SOURCE OF BIO-ENERGY TO RECHARGE SKIN'S HEALTH AND BEAUTY

Neodermyl® is a new quite active proven ingredient discovered and created by a patented green chemistry process. It contains a safe and pre-activated source of energy: MG6P (Methyl-Glucoside-6-Phosphate) to feed and stimulate aging cells.

To optimally reactivate collagens and elastin production, MG6P is combined with:

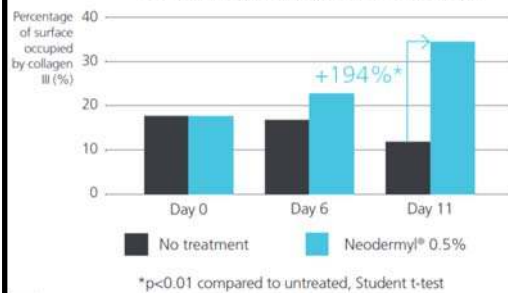

- ◆ Essential amino acids: Proline and Lysine that the body is not able to produce itself, which play a major role in the production of collagens and elastin.
- ◆ Copper to reactivate Lysyl oxydase, the enzyme which enables reticulation and maturation of collagens and elastin.

Neodermyl® is a pure source of bio-energy, which can naturally diffuse into skin, combined with SKIN THERAPY MAXIMAL STRENGTH EMU OIL to more DEEPLY and more completely penetrate INTO the skin- ingredients, moisture and anti-inflammatory therapies, re-energizing senescent/tired/retired fibroblasts and triggering essential elements to maximize collagens and elastin. Neodermyl® shows high clinical efficacy within 15 days resulting in quite visible reduction of deep wrinkles and improvement of skin volume and firmness.
