EVOLVE TITE

CUSTOMIZABLE HANDS-FREE BODY CONTOURING

Discover a hands-free contouring solution to improve and refine the appearance of skin.

Remodel your skin and reverse skin laxity on the abdomen, arms, hips, and thighs.

WHAT IS EVOLVE TITE?

Evolve Tite is an innovative non-invasive solution designed specifically to reduce the unsightly appearance of loose sagging skin. It is a quick and easy non-surgical alternative which will reshape your body.

Treatments can be customized and tailored to address your specific needs so the end result is a slimmer appearance with no downtime. Multiple body areas can be treated simultaneously leaving you with a more natural looking you.

HOW DOES EVOLVE TITE WORK?

Evolve Tite leverages clinically proven radio-frequency technology to stimulate collagen production and provide the ultimate in customizable body reshaping.

Evolve Tite was developed based on the clinical success of the proprietary A.C.E. (Acquire, Control and Extend) technology. A.C.E. technology targets deep within the skin to ensure that no areas are under, or over-treated, thereby maximizing results and providing consistent outcomes.

HOW SAFE IS THE TREATMENT?

Evolve Tite is recommended for individuals who are looking for a non-invasive skin treatment to address specific areas that require contraction. Tite can be used to reduce texture irregularities in lax skin and provide a natural firmer appearance. It is a very safe and effective procedure that can be used on all skin types and skin tones.

Evolve Tite is designed with a Patient Call Button so you can easily pause your treatment at any time and have clinic staff make adjustments to ensure your comfort.

DOES THE EVOLVE TREATMENT HURT?

Most clients find Evolve Tite comfortable. During your treatment you can expect a warming of your skin similar to a hot stone massage. As the radio-frequency penetrates the dermal layers patients typically notice a reduction in the folds of their skin leading to a smoother contour of the body. Textural irregularities will even out and sagging skin will appear more toned.

HOW MANY SESSIONS ARE REQUIRED?

It is recommended that weekly sessions of 30-60 minutes are performed over a six to eight week period. Gradual improvements in the treatment area can be seen following the first few treatments.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is absolutely no recovery period or downtime associated with Evolve Tite. It is a quick and painless treatment that can be done over your lunchtime, allowing you to return to your normal activities immediately. Patients will notice redness and warmth in the treated area which will subside after a few hours.
